

HIGH GAIN 2.4 - 2.5 GHz DIRECTIONAL ANTENNA

The S24015P12NF antenna offers the user a high-gain alternative to a yagi antenna in a much smaller package. The antenna is enclosed in a weather resistant UV stable housing that can be either mast or wall mounted using its articulating mount. E and H plane beamwidths (30°) are conducive to point-to-point bridge applications and the antenna's panel form factor allows it to be mounted inconspicuously.
